

## Tuesday

|                                                                                                          |  |
|----------------------------------------------------------------------------------------------------------|--|
| 1. How many grammes in $1\frac{1}{2}$ kg?                                                                |  |
| 2. Circle the odd one out:<br>$\frac{1}{2}$ $\frac{2}{4}$ $\frac{5}{6}$ $\frac{4}{8}$                    |  |
| 3. $6.54 \times 100 =$                                                                                   |  |
| 4. $71 \div 5 =$                                                                                         |  |
| 5. I spent 0.45 and 0.2 of my money. What decimal fraction is left?                                      |  |
| 6. Write 0.43 as a fraction                                                                              |  |
| 7. A bus can carry 54 passengers. If each passenger pays €3. How much money does the bus driver collect? |  |
| 8. How much less than 920 is the sum of 456 and 325?                                                     |  |
| 9. A movie started at 6:30 and finished at 9:17. How long did the movie play for?                        |  |
| 10. I receive €15.50 pocket money each week. How much will I have saved after 12 weeks?                  |  |

## Wednesday

|                                                                                                                             |  |
|-----------------------------------------------------------------------------------------------------------------------------|--|
| 1. $2.59 + 3.41 =$                                                                                                          |  |
| 2. $0.2 < 0.02$ True or False                                                                                               |  |
| 3. 6 pears cost €3.24. How much would 3 cost?                                                                               |  |
| 4. Double 27                                                                                                                |  |
| 5. What is the value of the underlined figure 23. <u>4</u> <u>5</u>                                                         |  |
| 6. One side of a square is 3cm long. What is the perimeter of the square?                                                   |  |
| 7. Find 0.5 of 12                                                                                                           |  |
| 8. $(27 - \underline{\quad}) + 4 = 18$                                                                                      |  |
| 9. A school has 284 students and 12 teachers. How many 70 seater buses are required to take the school to a football match? |  |
| 10. What must be added to the product of 74 and 29 to make 3,000?                                                           |  |

### Thursday

|                                                                                                                                                               |  |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------|--|
| 1. $4\frac{1}{5}$ hours = _____ minutes                                                                                                                       |  |
| 2. $83 \div 9 =$                                                                                                                                              |  |
| 3. Half 12.2                                                                                                                                                  |  |
| 4. Write $10\frac{1}{100}$ in decimal form                                                                                                                    |  |
| 5. Find the perimeter of a hexagon which has 4cm sides.                                                                                                       |  |
| 6. Round 89.56 to the nearest ten.                                                                                                                            |  |
| 7. Share 56c among 8 people. Write the number sentence                                                                                                        |  |
| 8. 200g of fruit at €5.50 per kg?                                                                                                                             |  |
| 9. By how much is the product of 14 and 17 less than 300?                                                                                                     |  |
| 10. The price of a season ticket to the hurling has increased by $\frac{1}{5}$ this year. If the ticket cost €250 last year, how much will it cost this year? |  |

## Friday

|                                                                                                                               |  |
|-------------------------------------------------------------------------------------------------------------------------------|--|
| 1. Find the product of 54 and 13                                                                                              |  |
| 2. 87 is _____ less than 145                                                                                                  |  |
| 3. 1, 3, 5, 7, _____, _____, _____                                                                                            |  |
| 4. When I roll 2 dice, the minimum score is?                                                                                  |  |
| 5. Count in $\frac{1}{4}$ 's up to 2. _____, _____, _____, _____, _____, _____, _____, _____.                                 |  |
| 6. Share €105 between 3 people. Each child gets _____?                                                                        |  |
| 7. _____ is $\frac{1}{3}$ of 60                                                                                               |  |
| 8. Find $\frac{2}{5}$ of 40.                                                                                                  |  |
| 9. Round 7,451 to the nearest 100                                                                                             |  |
| 10. $1\frac{3}{4}$ hours = _____ minutes                                                                                      |  |
| 11. How many degrees are in a right angle?                                                                                    |  |
| 12. A rope was 9m long. Two pieces measuring $4\frac{1}{2}$ m and 3m 56cm were cut from the rope. How long was the rope then? |  |
| 13. Jamie drank 350ml from a bottle of water. There were 450ml of water left. How much water was in the bottle to begin with? |  |
| 14. Helen had €18.30, Jane had €15.43 and Emmet had €11.80. How much money had the three children between them?               |  |
| 15. By how much is 23.67 less than 38.97.                                                                                     |  |
